## Summary

---

Telecommunication Engineering graduate with a strong analytical background and a passion for front-end development. Self-taught in React, JavaScript, TypeScript, HTML, and CSS, with hands-on experience building responsive, dynamic web applications. Seeking a junior front-end developer role to apply both engineering fundamentals and practical web development skills.

## Experience / Projects

---

**Job tracker** | *Website* | *Source Code* **ReactJS** | **JavaScript** | **Tailwind** | **Reactrouter** | **Local Storage**

- Developed an interactive web app to help users manage and track their job applications. Implemented **CRUD** functionality, allowing users to:
  - \* Create new job applications, including company details, job title, status, and application date.
  - \* Read and display job application data dynamically, allowing users to view all their applications at once.
  - \* Update the status or details of an application (e.g., from "Applied" to "Interviewing").
  - \* Delete applications when no longer needed.
- Focused on clean, reusable components and maintainable folder structure.
- Integrated **LocalStorage** to persist data across page reloads, ensuring that users' job tracking information is saved, and **ReactJS** for the user interface
- Designed the UI for ease of use with a focus on responsive design for both desktop and mobile views.
- Used state management in React to handle application data, ensuring smooth updates and re-renders when data changes.

**workout Planner** | *Website* | *Source Code* **ReactJS** | **TypeScript** | **Tailwind** | **Framer Motion**

- Built a **rule-based workout generator** that creates personalized workout plans based on user-selected health conditions and preferences, utilizing **ReactJS** and **TypeScript**.
- Implemented conditional logic to adjust exercises depending on constraints (e.g., injuries, beginner level, low-impact needs).
- Designed dynamic UI updates that render different workout plans without page reloads.
- Focused on smooth animations and fully responsive layouts for mobile and desktop devices.

## Technical Skills

---

**Programming Languages:** HTML5, CSS, TypeScript, JavaScript (ES6+)

**Responsive Design:** Mobile-first approach, CSS Grid, Flexbox, Media Queries, Web Accessibility (a11y)

**Dev Tools:** Git, Github, Figma, SASS

**Libraries/Frameworks:** ReactJS, Tailwind, React Router, Redux Toolkit

## Education

---

**Omdurman Ahlia University**

*Bachelor of Telecommunications Engineering*

**Graduation: Jun 2021**

*Khartoum*

- Courses: Networks, Data Communication, Digital Communication, Computer Architecture, Data Structures and Algorithms, Intro. to Cybersecurity

## Languages

---

- English — C1
- Spanish — B2
- Arabic — C2 (Native)
